

Suggested 7-row windbreak for plains areas

Descriptions of the trees: Although these species have proven adaptable to Colorado conditions, each may have limited adaptability to local soil types and/or conditions.

Caragana: medium to tall shrub; grows best on sandy to loamy soils; to 9,500' elev.

Cotoneaster: medium shrub; grows well on moist soils; to 9,500' elev.

Honeysuckle: tall shrub; grows well on moist soils; to 8,000' elev.

Chokecherry: medium shrub with edible fruit; grows well on moist soils; to 9,000' elev.

Ilac: tall shrub; grows well on moist soils; to 8,000' elev.; excellent for windbreak purposes.

Plum: tall shrub or short tree with edible fruit; grows well on moist soils; to 8,000' elev.; good wildlife species.

Sumac: medium, drought tolerant shrub; grows well on moist soils; to 8,000' elev.; good wildlife species.

Sage: medium, drought tolerant shrub; does well on poor soils; to 6,000' elev.; good erosion control species.

Wood rose: low shrub with pink flowers; rose hips are high in vitamin C; grows well on moist soils; to 8,000' elev.; good wildlife species.

Buffaloberry: tall, drought tolerant shrub with silvery bark and leaves, with edible red berries; to 7,500' elev.; good wildlife habitat

Fourwing saltbush: low shrub for salty ground; to 8,500' elev.

Golden currant: medium native shrub with bright yellow flowers and yellow to black edible fruit; to 8,000' elev.; good wildlife species.

Nanking cherry: medium shrub with edible fruit; below 8,000' elev.; good wildlife species.

Sand cherry: low shrub with edible fruit; best on sandy to loamy soils; to 7,500' elev.; short-lived.

Serviceberry: tall shrub with edible fruit and attractive flowers; for mountain sites up to 9,000' elev.

Mountain mahogany: medium tall shrub, valuable wildlife browse; drought tolerant; to 9,000' elev.; native

Gambel Oak: native tall shrub of southern Colorado; drought tolerant; to 9,000' elev.

Red-osier dogwood: medium tall shrub; prefers moist sites; attractive red stems with white flowers; to 9,000' elev.

Native willow mix: native collection of foothills riparian willows suited for streambank restoration; to 9,000' elev.

New Mexico forestiera (privet): all thicket former; drought tolerant; native; to 7,500' elev.

Wax currant: medium native shrub with edible red berries; to 11,000' elev.

Snowberry: low growing native mountain shrub; to 9,500' elev.

Green ash: medium to tall tree; grows well on moist soils; to 6,000' elev.

Siberian elm: tall, drought tolerant tree; grows well on moist soils; to 8,000' elev.; can be weedy near wetlands.

Hybrid cottonwood: tall tree for moist soils; to 6,500' elev. usually cottonless; no guarantee.

Narrowleaf cottonwood: tall tree; requires moist conditions; below 9,500' elev.

Golden willow: medium to tall tree; needs moist soil or supplemental water; to 8,000' elev.

Hackberry: tall tree; grows well on moist soils; best at plains elevations; to 7,000' elev.

Honeylocust: medium to tall tree; grows well on moist soils; to 7,500' elev.

Lombardy poplar: medium to tall columnar tree; needs moist soils or supplemental water; to 8,000' elev.; 15 year lifespan, therefore, not recommended as a component row species in windbreaks.

Bur oak: medium to tall tree; hardy and drought resistant species; tolerant of a wide range of soils; to 7,000' elev.; good food value for wildlife.

Coryle willow: six foot tall, native shrubby willow of rivers and creeks; to 9,500' elev.

Peachleaf willow: native, small tree of plains rivers; to 9,500' elev.

Prairie sky poplar: alternative to Lombardy poplar to 8,000' elev.

Kreminling cottonwood: broad leaf for mountain sites to 8,500' elev.

Fremont cottonwood: west slope native to 6,500' elev.

Aspen: tall, deciduous tree for moist mountain sites; not recommended for windbreaks; attractive fall colors; to 11,000' elev.

Austrian pine: tall tree; grows well on moist soils; to 7,000' elev.; good windbreak species.

Colorado blue spruce: tall tree; usually on moist soils but will do well on drier sites with supplemental water; to 9,500' elev.

Eastern redcedar: medium, drought tolerant tree; does well on moist soils; to 7,500' elev.; excellent windbreak species.

Ponderosa pine: tall tree; grows well on moist soils except for heavy clay; to 9,000' elev.; good windbreak species.

Rocky Mountain Juniper: medium, drought tolerant tree; does well on moist soils; to 9,000' elev.; excellent windbreak species.

Limber pine: medium, tall, drought tolerant, native; very strong against wind; to 11,000' elev.

Scotch pine: tall tree; does well on moist soils; to 7,000' elev.; excellent Christmas tree species.

Douglas-fir: tall tree; grows best on east and north slopes; 6,000' - 11,000' elev.

Engelmann spruce: tall tree of subalpine zone; demands shade; 8,000' - 11,000' elev.

White fir: tall tree; grows best on east and north slopes; 6,000' - 9,000' elev.; good Christmas tree species.

Bristlecone pine: medium to tall tree; does well on poor sites; 7,000' - 11,000' elev.

Lodgepole pine: tall tree; grows well on moist soils; 6,000' - 11,000' elev.

Pinon pine: medium, drought tolerant tree; to 7,500' elev. subalpine fir: tall tree of subalpine zone; demands shade; 8,000' - 11,000' elev.

THE COLORADO PROGRAM

The Colorado State Forest Service tree program enables farmers, ranchers and rural landowners to obtain trees at nominal cost. The program's aim is to encourage landowners to plant new forests; establish effective windbreaks to reduce erosion, protect homes, cropland, livestock and highways; and enhance wildlife habitat. Our trees and shrubs are grown for their conservation benefits only. Ornamental qualities such as color, degree of flowering, fruit production and others are not guaranteed.

To participate, landowners must have at least two acres of land and must agree not to use the trees for ornamental or landscaping purposes. These trees and shrubs cannot be resold as living plants (the roots must be severed). Contact your local nursery for ornamental needs.

PLAN BEFORE YOU PLANT

For planting plan assistance, contact your County Extension Agent, Natural Resource Conservation Service district manager, or State Forest district forester. These offices can provide information on windbreak planning and tree planting and care.

Nursery stock is produced and distributed by:

*Colorado State Forest Service
Colorado State University*

All CSFS programs and services are offered on a non-discriminatory basis, without regard to race, color, national origin, religion, sex, marital status, or handicap.
